QSP: pa3clq

Try this map to get an idea of real-time propagation conditions between Europe and US:

<http://wsprnet.org/drupal/wsprnet/map>

This is for the WSPRnet weak signal mode, but it will give you a good idea of conditions to different parts of the US.

The largest number of US SKCC members are in the east (which happens to be going strong on 20m at this moment).

Note that you have to select the band you are interested in on the WSPRnet map (it defaults to 30m).

In general most SKCC activity would on 20m or 40m.

Also use the K3UK sked page in an active manner, i.e., ask members individually if they would like to try a QSO.

Anyone who is logged in there should probably be willing to try a QSO with you.

People often frequent the K3UK page with such requests in mind and will be happy to respond.

[slowspeedwire] TELEGRAPH CALL SIGNS / calls TO Office

Florida Chapter MTC has a project of attempting to save as many office calls as possible. The response from members has been almost overwhelming.

Before he died, Bill Dunbar contributed all of the calls that he had collected.

I have been attempting to place all of the calls on our website

<http://floridamorse.com/gpage.html>

but have not been able to post them all. (I have been having eye problems.)

I will look at the CD that Bill Dunbar sent and see if it included the line you are looking for and let you know later on today.

I will also look at the other responses which have not yet been posted, to see if perhaps the LS&MS might be in one of those submissions.

All Railroad Office have had a callsign

73, J.P. pa3clq / JO NS

Hi All,

A college friend just sent me the following link to an article about a telegrapher.

The article implies he lives in Toledo, OH. His name is Barney Stickles.

Anybody know him?

He was doing a demo in Waterville, OH.

<http://www.toledoblade.com/local/2014/11/20/Telegrapher-connects-at-event-in-Waterville.html#KAKUMDZQTEevWRhc.99>

The LB & P Railway opened – Burketon Jct to Bobcaygeon 1904 –Leased to CPR in 1903

Abandoned Burketon Jct to Lindsay 1932 – Lindsay to Bobcaygeon 1961.

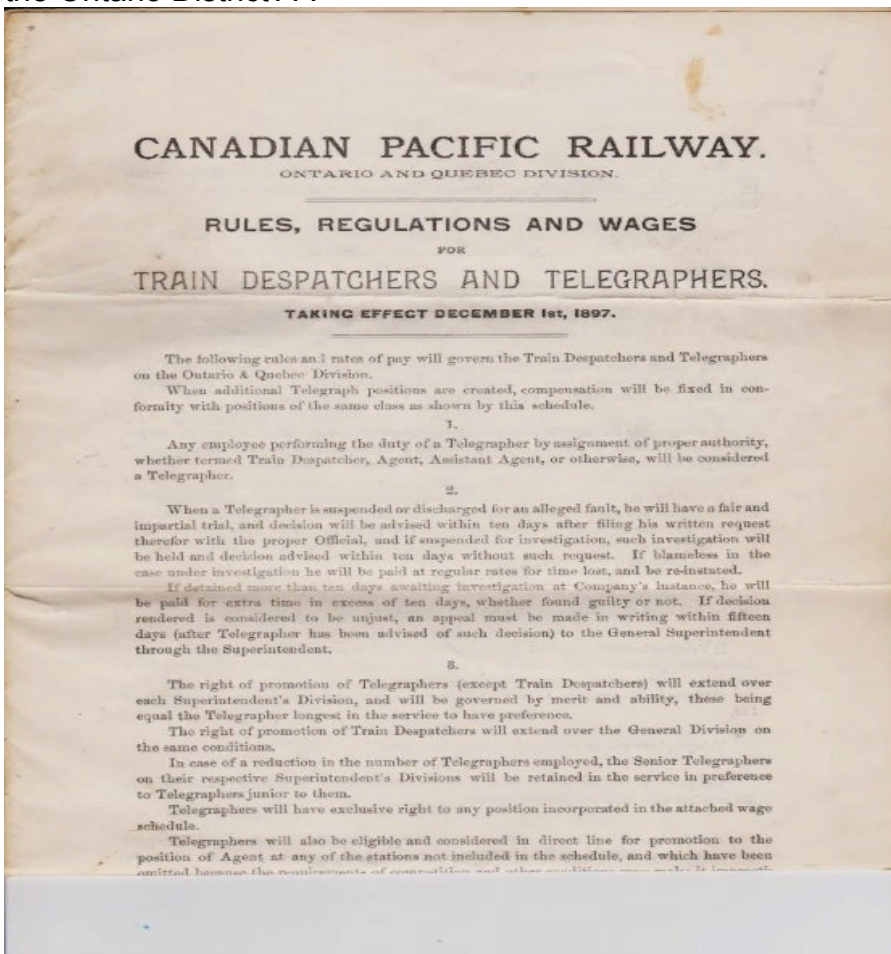

Today – Pontypool is an UNINCORPORATED VILLAGE in the southernmost part of the amalgamated

CITY OF KAWARTHA LAKES!

Do you want some CANADIAN PACIFIC RAILWAY TELEGRAPHER HISTORICAL DOCUMENTS in the CITY OF KAWARTHA LAKES CN KINMOUNT RAILWAY MUSEUM ???

The CPR historical documents would be for CPR Trick Dispatchers and Telegraphers in the Ontario District???

Gren Schrader SlowSpeedWireGroup

You find the book of Valery / UA3AO "Ключи, соединившие континенты" / "Keys connected the continents"
